Profile

Experienced Full Stack Developer with expertise in the MEAN/MERN stack, passionate about creating innovative solutions and seeking to join a dynamic team to apply my frontend and backend skills.

Professional Experience

Associate Software Developer, *ValueCoders*   01/2022 – present
As a Full Stack MEAN/MERN developer, I played a key role in designing, developing, and optimizing robust software solutions for various projects and organizations. I implemented advanced technologies and worked closely with teams to deliver solutions that effectively met client needs.

Skills

| JavaScript | TypeScript | Node.js | Angular | HTML | CSS | Bootstrap |

| REST API | MongoDB | MySql | IONIC | React.js | Git |

Projects

Virtua Research(Fintech),   10/2023 – present
Software Developer-L2(Full Stack developer) ⬈
At Virtua Research, an ISO Certified financial services technology company, I enhanced application functionality by solving bugs, implementing new business logic, and conducting R&D. I created detailed RCA and FT reports, ensuring optimal performance and business compliance across multiple modules, contributing to a comprehensive and integrated system.

GetVantage,   08/2023 – 09/2023
Software Developer-L2(Backend Developer) ⬈
At GetVantage, I ensured secure access by creating authentication and authorization modules and developed profile and subscription management functionalities. I streamlined API interactions with a wrapper service and created investor verification modules.

OpenEMIS (Exams, Dashboard, Registration, Survey),   05/2022 – 08/2023
Software Developer-L2(Frontend Lead) ⬈
As the Frontend Lead for a UNESCO-affiliated School CRM project, I drove Angular development, implemented new functionalities, and migrated from Angular 5 to 11. I developed new project and resolved bugs, integrated APIs, worked on an Ionic 3 app for Android compatibility, streamlining school management and enhancing the user experience.

cheeseburger/E-commerce, *Frontend Developer*   02/2022 – 04/2022
Developed a user-friendly eCommerce platform for government officials, implementing new components for a dashboard and inventory management system using Angular and Node.js. Solved bugs to improve code maintainability and performance, and added new features to enhance user experience and functionality.

Education

Bachelor of Technology in Computer Science and Engineering, *PDM university* ⬈   2017 – 2021
